Email Processing

Process and label emails, download attachments, and log out

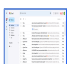

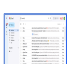

Scenario Outline

Given the bot is logged into the email page "<email>" and "<password>"  
And log in correctly  
When the bot retrieves emails with the subject "Neostella"  
And it labels those emails as "processing"  
And the bot retrieves emails with the subject "-Neostella"  
And it labels those emails as "exceptions"  
Then the bot downloads the unread documents from the "processing" emails  
And saves the attachments to a shared folder with the current date  
And verifies that the inbox has no incoming emails "Neostella"  
And the bot finishes by logging out

Examples:

Show 10 entries		
#	Email	Password
1	est.atroyano@smart.edu.co	Candado315@
Showing 1 to 1 of 1 entries		Previous 1 Next

Steps	Screenshot	Outcome	Duration
Process and label emails, download attachments, and log out #1: (javascript:void(0)) {url=est.atroyano@smart.edu.co, password=Candado315@} (javascript:void(0))		ERROR	85.24s
